

COMMUNITY THERMAL IMAGING PROJECT

Helping You Keep Your Warmth In

HOLBROOK PARISH COUNCIL has another opportunity to borrow a thermal imaging camera for free from **TUESDAY 5th DECEMBER 2023 to FRIDAY 5th JANUARY 2024**, following on from last year's pilot scheme.

Our aim is to raise awareness about insulation and help you improve the energy efficiency of your home. This could mean:

- ❖ a reduction in fuel bills
- ❖ better health
- ❖ reducing your carbon emissions

Visit www.greensuffolk.org for further help & information

What can you learn from a thermal imaging survey?

If your house is relatively new, already has insulated cavity walls and double glazing and feels warm – you might not learn much, except to get an even warmer glow after confirming your house is well insulated!

If your house is older and seems difficult to keep warm - you might learn exactly where the heat is escaping and get some ideas about where to insulate. A thermal imaging survey might:

- ❖ identify places which might have draughts
- ❖ detect whether cavity wall insulation is patchy or missing
- ❖ detect areas with less loft insulation

If you would like us to include your house in the survey please contact us on

holbrookparishclerk@outlook.com, or 01473 327663

The cameras use infra-red radiation which **cannot** pass through glass. This means the camera cannot see through windows, doors or walls. A thermal imaging survey will not invade your privacy as we will only see the outside surface of your house.
